

The Smartest Way to Grow Grass.

## Why Choose RapidGrass?

Hydroseeding is an advanced grass planting process that is fast, efficient, cost effective and environmentally responsible.

RapidGrass Hydroseeding is one of only a few companies in the Alberta-area that is able to provide this specialized service. We believe:

### ***1. Customer Education + Follow-up + Support = Customer Satisfaction.***

We provide all of the information that you need to make an informed decision and to ensure a successful RapidGrass installation. We will only hydroseed if it is the right choice for you.

Our company is so confident with our service that we offer a **SATISFACTION GUARANTEE**. We also offer the **Good Neighbour Referral Program** as one more way of proving our customer satisfaction commitment to you.

### ***2. Quality counts!***

RapidGrass guarantees consistent, dependable hydroseeding application on every job. Responsiveness and customization are cornerstones of our business; we are ready and willing to do whatever it takes to satisfy our customers.

### ***3. Experience and ongoing training does make a difference***

After extensive research, study and staff training, we introduced the RapidGrass Hydroseeding service in Alberta . Since then our skilled professionals have taken advanced courses to further their knowledge base. RapidGrass also developed and implemented a **Quality Assurance and Training Program** for all of our personnel to ensure successful installations and service.

### ***4. Investing in high quality equipment and materials is essential***

RapidGrass sets the industry standard by selecting the right grass seed then applying it at a concentration rate to accelerate and maximize grass growth.

RapidGrass ONLY uses professionally formulated WOOD-FIBRE MULCH applied at the appropriate thickness. While some companies cut corners by using recycled paper-fibre mulch, this can produce inferior grass growth.

RapidGrass uses ONLY professional grade hydroseeding equipment.
